Raphael:

I got a call from a Kevin Frensel who is a contract Project Manager for El Paso Corporation that indicated that they may be a PRP at the Site. I believe that he told me that he thought they had sent some waste to the facility. I told him that I was not aware of any waste per se being sent to the facility. I gave him a status update indicating that we were working on an AOC to address the site. (One for a Remedial Action and the other for a Removal Action). I gave him Brenda Cook's number because he wanted to find out some more information about the site. His telephone number is (b) (6)

Thanks
